14 February 1983

MEMORANDUM FOR: Deputy Director for Operations
Chief, Counterintelligence Staff/DDO

FROM: Executive Assistant to the DDCI

During his 10 February session with Under Secretary of State Eagleburger and D/INR Montgomery, the DDCI advised them of the contents of Headquarters Message [redacted] detailing KGB methods of operation [redacted] including exploitation of unclassified messages obtained from Embassy locals. The DDCI also mentioned other security concerns, such as career counseling sessions over open phone lines, etc. Montgomery and Eagleburger were both appalled and want to bring these practices to a halt. The DDCI agreed to provide Montgomery a memorandum detailing the problems that he in turn could convert to a worldwide message to all State posts. Would you please develop an appropriate memorandum to serve this purpose by the end of the week.
